

MaxiCut[®]

ULTRA[™]

proRange[®]

MaxiCut[®] Ultra[™] Sleeves are the perfect companion for one of our cut gloves to offer increased protection for your arm.

Certified to be washed.
CLEAN, FRESH AND COST EFFECTIVE

TECHNOLOGIES INSIDE

For protection against cuts

Innovative fibres - CUTtech[®] combines and blends high performance yarns and fibres to impart different levels of cut protection with the driving philosophy to deliver high levels of comfort and wearer satisfaction.

CLEANLINESS GUARANTEED

We use our HandCare[®] Program for every single ATG[®] product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all final products after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities. This enables us to guarantee our products to be "Fresh out of the pack" which is certified according to Standard 100 by Oeko-Tex[®].

And if that wasn't enough our gloves and sleeves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional workers the confidence that ATG's[®] full range of products are "dermatologically safe" and the science and research behind them is robust.

Of course our whole manufacturing process is in line with the requirements of the European REACH Regulation (Registration, Evaluation, Authorisation and restriction of Chemical Substances). We do not use any SVHC during our manufacturing process.

CLEANLINESS GUARANTEED
